

Tadiran Batteries Environmental Policy

Tadiran Batteries wishes to prevent environmental (Ecological) hazards and minimize any environmental impacts related to its activities. Hence the company will follow the principles listed below, according to ISO 14001:

- Tadiran Batteries will take all necessary steps to prevent environmental (Ecological) hazards. Minimize the environmental impacts arising from the processes at the plant and the product it provides, and will work to achieve the highest level of resource conservation.
- Tadiran Batteries attaches great importance to cooperation with local/national authorities and in order to fully comply with regulations and satisfying the environmental concerns of the community.
- Environmental conservation shall be an integral part of Tadiran Batteries development plan and shall be implemented in its production facilities and products.
- Tadiran Batteries shall invest all necessary resources in the development of environmental awareness through instruction and training of its employees while striving for continuous improvement in dealing with environmental concerns.
